PROFESSIONAL SUMMARY

Data Scientist who turns real-world data into production AI systems. Builds end-to-end machine-learning and SaaS products in industry — production backends, analytics systems, computer-vision pipelines, and AI-driven automation — owning the path from raw data to shipped, revenue-generating features. Backed by a first-class Statistics degree and four peer-reviewed publications, pairing rigorous statistical foundations with full-stack engineering to deliver measurable impact.

EDUCATION

BSc in Statistics — Shahjalal University of Science and Technology (SUST), Sylhet Graduated July 2025
CGPA 3.86 / 4.00 — Ranked **2nd** in a class of 65

EXPERIENCE

Onwards Analytics Australia (Remote)
Data Scientist Nov 2025 – Present

- Worked on a production-grade AI computer vision pipeline for real-time biomechanical pose estimation, leading full-lifecycle delivery across system architecture, model integration (MediaPipe, RTMPose, ViTPose, YOLOv8), metric engineering, benchmarking, and iterative optimisation that improved model accuracy and inference reliability.
- Engineered and shipped the production backend of [Nexlytics](#), a B2B data-analytics SaaS, co-building its audit-trail and scoring engines and the RAG pipelines behind its AI features.
- Co-lead engineering and production launch of **Mockingbird**, a multi-tenant AI ad-intelligence SaaS: architected the brand-neutral LLM/vision generation engine (Gemini, Ideogram), enforced RLS-based tenant isolation across a Cloudflare Workers + Supabase/Postgres backend, shipped the daily-drop scoring and preference-learning loop, and hardened the codebase through a full security and repository audit ahead of launch.
- Drove full-stack engineering and go-live delivery of [MobiPet](#), a live two-sided veterinary marketplace (React/TypeScript, Supabase/Postgres with RLS and Edge Functions, Stripe, Cloudflare): shipped production fixes across authentication, booking integrity, geolocation and admin workflows, and built guarded data-migration and release-verification tooling to protect live customer data.

Data Scientist Intern Aug 2025 – Oct 2025

- Architected agentic AI and automation pipelines (n8n, Power Automate, MCP servers) that ran end-to-end consulting-delivery workflows for enterprise clients, alongside product-strategy and go-to-market documentation.
- Delivered cross-functional engineering across Playwright-based automated UI/UX testing, backend infrastructure, GitHub Actions-scheduled web scraping and full-lifecycle SaaS QA.

DataKothon Research Lab Bangladesh
AI Research Intern Jun 2025 – Aug 2025

- Drove the full modelling lifecycle (data preparation, feature engineering, model development and evaluation) on large real-world research datasets, translating open research questions into reproducible machine-learning experiments.

TECHNICAL SKILLS

Languages: Python, SQL, R

Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, NLP, LLMs (Gemini, Claude), Retrieval-Augmented Generation (RAG), Generative AI, Agentic AI (Claude Agent SDK, MCP), LLM pipeline design

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow/Keras, FAISS, MediaPipe, Matplotlib, Plotly

Backend, Cloud & Databases: FastAPI, REST APIs, PostgreSQL, Supabase (RLS, Auth, Edge Functions), Cloudflare Workers & Pages, Stripe, Resend, Cloud Deployment & Migration

DevOps, Automation & Testing: Git, GitHub Actions, CI/CD Pipelines, wrangler, n8n, Power Automate, MCP Servers, Playwright, Vitest, Postman

BI, Analytics & Statistics: Power BI, Tableau, Statistical Modelling, Hypothesis Testing, SPSS, STATA, SAS

PUBLICATIONS

Journals

- [Predicting Child Development Across Literacy, Physical, Learning, and Social-Emotional Domains Using Supervised Machine Learning \(MICS 2019, Bangladesh\)](#) — *Wiley Health Science Reports*, **Q2**.
- [The Effects of Household Water, Sanitation, and Hygiene \(WASH\) on Early Childhood Education Enrollment in Bangladesh](#) — *BMC Public Health*, **Q1**.

Conference

- [Comparative Study of Feature Selection Techniques in Predicting School Attrition Among Female Students in Bangladesh](#) — **IEEE BECITHCON 2024**.
- Exploring the Impact of Malnutrition, Fever and Acute Respiratory Infections on the Physical Development of Children under Five in Bangladesh, Nepal and Pakistan (Punjab): Evidence from MICS 2019 — **International Conference on Applied Statistics & Data Science (ICASDS), 2025 — Best Poster Award**.

PROJECTS

- **Nearly — AI Visual Product Search Engine:** Built an end-to-end visual search system: EfficientNet-B0 transfer learning for 1280-D embedding extraction, a FAISS vector index for top-K nearest-neighbour retrieval over fashion catalogues, and a Streamlit front end with metadata-aware recommendation re-ranking. [GitHub](#)
- **PricePulse — Unsupervised Anomaly Detection for Retail Price Monitoring:** Architected an anomaly-detection service with PyTorch autoencoder scoring, FastAPI REST backend, Playwright scrapers for JS-rendered pages, SQLite time-series store and GitHub Actions cron automation, flagging statistically anomalous price movements across 150+ Apple products. [GitHub](#)
- **Smart Urban Mobility — Analytics & ML on Ride-Sharing and Food Delivery:** Engineered a Python + SQL analytics pipeline over multi-service operational data, spanning cleaning, EDA, statistical hypothesis testing and recommendation modelling, to surface demand and service-quality drivers. [GitHub](#)
- **60 Days of SQL Challenge:** Sustained deep dive into advanced SQL (window functions, CTEs, query optimisation) solving business problems across retail, e-commerce, finance and FMCG datasets. [GitHub](#)
- **CO₂ Emission Forecasting (2030):** Time-series forecasting (Prophet, ARIMA) of country-level CO₂ emissions with trend decomposition and scenario analysis. [GitHub](#)

LEADERSHIP

- **Vice President, SUST Data Science Club** — led student mentoring, cross-functional coordination and university-level data-science initiatives and community growth.
- **Team Leader** — led high-performing teams to multiple podium finishes across national data-science competitions and Olympiads, owning strategy, collaboration and execution.

HONORS & AWARDS

- **Best Poster Award** — ICASDS 2025, University of Dhaka · **2nd Runner-up** — Data Innovators Challenge 2024 · **2nd Runner-up** — ML Olympiad 2024 · **Finalist** — Robi Datathon 3.0 (2024) · **Kaggle 2× Expert**
- **Multiple university scholarships** for outstanding academic performance · **1st Runner-up** — Astrophysics Olympiad · **Champion** — Biggan Joyotshob (science fair) · **5th Place** — National Science Olympiad (Regional)
